

School Supplies 2023-2024

School supply lists are evolving significantly with the requirement that high school students have an electronic device such as a notebook computer for school. Any school supplies needed beyond the below will be communicated by the classroom teacher.

School Supplies

- Electronic devices (For more information, please review the province's [device specifications](#))
- Loose leaf (200 sheets) and something to hold the loose leaf such as a binder. Dividers between subjects would be helpful. However, most notes should be able to be recorded via the electronic device.
- A few pens, pencils and erasers, and highlighters
- Scientific Calculator
- Clean sneakers and clothing for gym class

Some specialty classes require additional supplies. Classroom teachers will notify students during the first days of class if any additional materials are needed.
