

School Supplies 2024-2025

School supply lists are evolving significantly with the requirement that high school students have an electronic device like a notebook computer for school. Any school supplies needed beyond the below will be communicated by the classroom teacher.

School Supplies

- Electronic devices and charging cable (For more information, please review the province's [device specifications](#))
- Loose leaf (200 sheets) and something to hold the loose leaf such as a binder. Dividers between subjects would be helpful. However, most notes should be able to be recorded via the electronic device.
- Highlighters
- Whiteboard markers
- Pens, pencils and erasers
- Scientific Calculator
- Clean sneakers and clothing for physical education classes

Some specialty classes require additional supplies and fees. Classroom teachers will notify students during the first days of class if any additional materials are needed.
